MCAA Releases Revised and Expanded Model Safety & Loss Prevention Program, Adds to Growing Library of Safety Materials

ROCKVILLE, MD—The Mechanical Contractors Association of America, Inc. (MCAA) added another title to its extensive safety library today with the release of a revised and expanded version of its popular *MCAA Model Safety & Loss Prevention Program*. This model program was designed to assist mechanical construction firms in the development and implementation of comprehensive safety and loss prevention programs.

This resource includes a fundamentally sound, industry specific safety and health program model, and 12 additional model program addendums covering accident investigations, bloodborne pathogens, confined space entry, excavation safety, fall protection, hazard communication, hexavalent chromium, job safety analysis, lead, lockout/tagout, mold prevention, and respiratory protection. All of the programs are designed to be quickly and easily tailored to meet a company's specific needs.

MCAA members received a free copy of the *MCAA Model Safety & Loss Prevention Program* as a benefit of membership. Additional copies of the model program are available for purchase for \$225 (member) or \$675 (non-member), plus shipping. To order, visit www.mcaa.org/store or call 301-990-2200.

The Mechanical Contractors Association of America, Inc. (MCAA) serves the unique needs of approximately 2,500 firms involved in heating, air conditioning, refrigeration, plumbing, piping, and mechanical service. We do this by providing our members with high-quality educational materials and programs to help them attain the highest level of managerial and technical expertise. MCAA includes the Mechanical Service Contractors of America, the Plumbing Contractors of America, the Manufacturer/Supplier Council, the Mechanical Contracting Education and Research Foundation and the National Certified Pipe Welding Bureau.
