### **Robert ("Bob") Turner Receives MCAA's Distinguished Service Award** *Tucker Mechanical, An EMCOR Company, president and CEO is this year's top honoree*

ROCKVILLE, MD—Robert ("Bob") Turner, president and CEO of Tucker Mechanical, An EMCOR Company, in Meriden, CT, received the Mechanical Contractors Association of America's (MCAA) Distinguished Service Award. The award—the association's highest award—was presented on March 7, during the Opening General Session of the association's annual convention in Wailea, Maui, Hawaii.

MCAA President Bob Armistead presented the award, reading from the award certificate,

" As an enduring testimony to his commitment to the mechanical contracting industry and his association at the local and national levels, the Mechanical Contractors Association of America presents its Distinguished Service Award for 2010 to Robert Turner.

For more than twenty-five years the mechanical industry in Connecticut has benefitted from Bob Turner's leadership. He has twice led the MCA of Connecticut as its president. He is a twenty-five year member of its Board of Directors. He has shared his expertise as a Pension and Health and Welfare Fund trustee, as chair of its Labor Committee, Education and Membership committees and as chair of its Industry Fund.

At the national level, Bob Turner's contributions to MCAA have also been many, and they have also been substantial. He was a valued member of the Board of Directors for six years. He played a major role in the growth of MCAA's world class Advanced Leadership Institute as chair of the association's ALI Committee. And MCAA has benefitted greatly from Bob Turner's business acumen during his thoughtful tenure as chair of MCAA's Audit Committee."

The MCAA Distinguished Service Award recognizes an individual for his or her contributions to the progress, development, and expansion of our industry, as well as for outstanding achievement and distinguished service to the Mechanical Contractors Association of America.

The Mechanical Contractors Association of America, Inc. (MCAA) serves the unique needs of approximately 2,500 firms involved in heating, air conditioning, refrigeration, plumbing, piping, and mechanical service. We do this by providing our members with high-quality educational materials and programs to help them attain the highest level of managerial and technical expertise. MCAA includes the Mechanical Service Contractors of America, the Plumbing Contractors of America, the Manufacturer/Supplier Council, the Mechanical Contracting Education and Research Foundation and the National Certified Pipe Welding Bureau.
