### **Mark Rogers Becomes MCAA President**

*Philadelphia-based contractor is an advocate of industry education*

ROCKVILLE, MD—Mark Rogers became President of the Mechanical Contractors Association of America (MCAA) at the close of the association's annual convention in Wailea, Maui, Hawaii, on March 10.

Mr. Rogers is the chief operating officer of West Chester Mechanical Contractors, Inc., an HVAC, service and plumbing contractor that he started in 1996. The company serves the Philadelphia, PA area.

Appointed to MCAA's Board of Directors in 2003, Mr. Rogers is active in the association on both the national and local levels. At the national level, he serves on the Executive Committee and the Board of Directors. He is chairman emeritus of the Education Committee and has served on a number of task forces that have developed MCAA education programs. He represents the Education Committee to the MCAA Manufacturer/Supplier Council Governing Board, comprised of leaders from MCAA's supplier partner member companies. And, he is a graduate of MCAA's prestigious Advanced Leadership Institute (ALI).

At the local level, Mr. Rogers served as president of the MCA of Eastern Pennsylvania. He is also a trustee and serves on several committees.

On a personal note, Mr. Rogers is blessed with a beautiful wife, Colleen, and three wonderful sons. He is an avid sports fan, loves attending his sons' ice hockey, lacrosse and baseball games and kicks back riding his Harley Davidson motorcycle.

The Mechanical Contractors Association of America, Inc. (MCAA) serves the unique needs of approximately 2,500 firms involved in heating, air conditioning, refrigeration, plumbing, piping, and mechanical service. We do this by providing our members with high-quality educational materials and programs to help them attain the highest level of managerial and technical expertise. MCAA includes the Mechanical Service Contractors of America, the Plumbing Contractors of America, the Manufacturer/Supplier Council, the Mechanical Contracting Education and Research Foundation and the National Certified Pipe Welding Bureau.
