Chuck Fell Elected MCAA's Vice President & Assistant Treasurer

Houston-based contractor's entrepreneurial spirit brings fresh perspective

ROCKVILLE, MD—Chuck Fell was elected Vice President & Assistant Treasurer of the Mechanical Contractors Association of America (MCAA) during the association's annual convention in Wailea, Maui, Hawaii, earlier this month.

Mr. Fell is president of CFI Mechanical, Inc., a mechanical construction and plumbing contractor known for placing an emphasis on professionalism and adherence to world-class quality standards. The company, which is located in Houston, Texas, has a reputation for effectively managing the details associated with installations in diverse sectors of the private and public markets.

As the founder of CFI Mechanical, Chuck recognizes the importance of surrounding himself with the right people. His thirst for professional knowledge brought him to the MCA of Houston, where his involvement included service as that organization's president, as well as on the Boards of Directors for the Plumbers Negotiations Committee and the Local 68 Joint Apprenticeship Training Committee and as chairman of The Health and Welfare, Pension, and Apprentice Trust Funds Committee.

A past president of the MCA of Texas who also served on the MCA of Texas/Texas Pipe Trades Joint Apprenticeship Committee, Mr. Fell later parlayed the knowledge gained from his state and local involvement into involvement with MCAA.

His first exposure to MCAA came in the form of attending various educational programs. This was shortly followed by service on the Labor Estimating Manual Committee and the PCA Board of Directors.

He was appointed to MCAA's Board of Directors in 2006, and to the Executive Committee as part of his selection as Vice President & Assistant Treasurer.

On a personal note, Chuck is blessed with a beautiful wife, Lynn, and two lovely daughters. He enjoys golf, fishing and hunting.

The Mechanical Contractors Association of America, Inc. (MCAA) serves the unique needs of approximately 2,500 firms involved in heating, air conditioning, refrigeration, plumbing, piping, and mechanical service. We do this by providing our members with high-quality educational materials and programs to help them attain the highest level of managerial and technical expertise. MCAA includes the Mechanical Service Contractors of America, the Plumbing Contractors of America, the Manufacturer/Supplier Council, the Mechanical Contracting Education and Research Foundation and the National Certified Pipe Welding Bureau.
