Precedent Voyager with Symbio 700

April 28th-29th. 2-Day Class

The Precedent and Voyager with Symbio 700 program provides the technical knowledge and skills required to start-up, service and troubleshoot Precedent units with Symbio 700 controls and is intended to familiarize technicians with the new Precedent with Symbio 700 controls rooftop unit. This course will cover new product information with an emphasis on the Symbio 700 control platform.

Symbio 700 Course Objectives:

- Sequence of operation
- Diagnose and Troubleshoot
- Wiring Schematics
- Verify and adjust airflow.
- 700 control platform
- Symbio mobile app
- staged and modulating heat
- Economizer control

Steamfitters Technology Center
