

## 20 Years of Safety Excellence – **February 2023: Personal Protective Equipment**

PPE is the last line of defense, and sometimes all you need to prevent an injury or save a life. Preventable injuries impact our safety culture, company morale, and our bottom lines. This month's kit includes our newest videos on hearing protection, head protection, eye protection, respiratory protection, and hand protection. These videos are a candid look at what happens when you don't wear PPE, and how easily you can help yourself and others by wearing these lifesaving pieces of personal protection.
