

OSHA Final Rule Occupational Exposure to Beryllium

Common Sense Compliance Strategies

FEB 2 2017

The Occupational Safety and Health Administration recently published a final rule, effective March 7, 2017, that substantially lowers the permissible workplace exposure to beryllium in general industry and the construction industry.

This live webcast session summarizes the final rule and provides common sense compliance guidance so your organization can avoid any costly penalties under OSHA's newly increased penalties that became effective on August 1 2016.

This webcast will answer these Frequently Asked Questions and others:

- ✘ Which **industry sectors** does OSHA intend to focus on when the rule takes effect?
- ✘ What are the new **permissible exposure limits** (PELs)? Action Level, 8 hour TWA, STEL?
- ✘ What are the minimum requirements of the "**Beryllium Exposure Assessment?**"
- ✘ How do I manage the **PPE**, respiratory protection, and beryllium-exposed clothing?
- ✘ Is your company required to implement a **medical surveillance** program for beryllium?
- ✘ Our **welding rods** contain beryllium. Is that enough to trigger this requirement?
- ✘ Is there an **easy way** for us to prove that this rule doesn't apply to us?
- ✘ Are there any **exemptions** for companies who feel this rule doesn't apply to them?
- ✘ Have questions in the meantime? Email us at hilgemangroup@frontier.com !

Trainee Takeaways

Each trainee will receive the following:

- A written “Beryllium Safety” policy that can be tweaked to fit your operations, and
- A personalized training certificate.

Who Should Attend?

This program is for anyone in your organization who has any responsibility for ensuring compliance with the new OSHA Beryllium Exposure Standard.

- ✓ **Safety Managers**
- ✓ **Human Resources Personnel**
- ✓ **Maintenance Leaders**
- ✓ **Safety Committee Members**

Price

\$195 per location
